Subject: U277 File Size Limitation
As mentioned in our Technical Consortium meeting of 9/15.

We need to build a table for a maximum file size for the U277 and the supplemental files. To do this we need to know what size makes sense, so we can split up the files accordingly, and transmit to the Healthplan folders.

Therefore we need your input on any limitations in your translators or processes, and we need to know if you have preferences/suggestions that we need to take under consideration.

In general, we are suggesting that the file size be no greater than 50meg. This will ensure that Mercator can handle the processing without any problems.

We are asking that each Health Plan respond to this email by COB, Wednesday, September 22nd, so that we can ensure your needs and preferences are consider in the final solution.

Thanks in advance for you inputs!
